HATE CATS?

Frankly, I'd rather you just get out of here.

Because we're so good with the ladies cats will never disappear completely. Back in the old days Animal Control used to trap my forefathers, then remove or kill them- but that only created a "vacuum effect" letting new cats move in and start the cycle over again. If you fix us and put us back (Trap-Neuter-Return) we won't make new cats and we'll prevent new cats from moving in.

But what if this doesn't

completely solve my problem? I just want you gone! I'm sorry I can't help you 100%, but lets be realistic. Poisoning us is a felony, and if we died new unfixed cats would only take over again. That's why Animal Control no longer wastes taxpayer money trying to catch us.

Trap-Neuter-Return is much more effective Give it a try!
